Full Stack Web Developer

CAREER OBJECTIVE

Full Stack Web Developer trainee at Orange Coding Academy, with hands-on experience in building web applications using Angular, ASP.NET Core, and SQL Server. Led teams as Scrum Master in three projects using Agile methodologies. Passionate about delivering scalable solutions and continuously developing technical and soft skills. Seeking a role in a dynamic environment to contribute and grow.

Technical Skills

Front-End Technologies: HTML, CSS (Bootstrap), Tailwind, Java Script, TypeScript and Angular.
Back-End Technologies: C#, ASP.Net Web Form, ASP.Net MVC Core and ASP.Net Core Web API.
Database: SQL, SQL Serve, MySQL, Oracle
Software Development Practices (SDLC): Scrum, Agile, Product Owner
Other Tools: Git (Version Control Systems), GitHub, Figma, Trello, Google Stitch.

Soft Skills

Problem-Solving | Critical Thinking |Time Management Decision-Making & Prioritization | Communication | Project Management | Active Listening | Self-Motivation |Teamwork & Collaboration | Continuous Learning

Experience

ESKADENIA Software **Oct 2025 – Present**

Worked as a Junior FullStack Web Developer Developer at a **ESKADENIA Software**, where I gained hands-on experience with Angular, .NET Core, and MySQL. Contributed to the development and handling of an HR Management System, working on assigned tasks related to system functionality, data management, and employee-related features while collaborating with the development team.

Ecorama Platform. GitHub Link **May 2025 - Jun 2025**

I served as the Scrum Master for the **Ecorama** platform, a bilingual web application developed for the **UNHCR**. The platform provides essential services such as displaying past workshops, managing partner listings, dynamic registration forms, announcements, user authentication, profile history, video-based courses with downloadable resources, and a complete admin dashboard. The project was fully responsive, supported both Arabic and English with layout adjustments, and followed Agile methodology throughout the development process and soon it will be **live Demo.**

Orange Coding Academy, Irbid-Jordan **Dec 2024 - May 2025**
Full-Stack Web Developer Trainee
Intensive course in Full Stack Web Development in collaboration with Simplon.co and Princess Sumaya University for Technology (PSUT)
Work Experiences:
• Developed and maintained responsive web applications using HTML, CSS, Bootstrap, and JavaScript, improving user interface and overall user experience.

• Assisted in building and optimizing back-end services using MVC, ASP.NET Core, and SQL, ensuring the creation of robust and scalable solutions.

• Collaborated closely with cross-functional teams to deliver high-quality code, fostering teamwork and enhancing project management skills.

• Contributed to the design and implementation of database structures, improving data retrieval efficiency, security, and integrity.

• Implemented secure user authentication and authorization mechanisms for web applications, ensuring data security and privacy.

Projects

1) HR Management System. GitHub Link
Description: A comprehensive HR Management System built using ASP.NET Core MVC to streamline employee lifecycle processes. The system includes features such as employee management, attendance tracking, task assignments, leave requests, and performance evaluations. It utilizes SQL Server for data storage and follows the MVC architecture to ensure scalability and maintainability. Designed to enhance efficiency in managing HR operations within a web development company.

2) Library Management System GitHub Link
Description: Developed a Library Management System for a library using ASP.NET Core MVC and SQL Server. The system enables users to register, search for books, borrow books, reserve meeting rooms, and provide feedback while allowing library administrators to manage books, confirm borrow requests, oversee room reservations, review feedback, and generate reports in PDF/Excel. Implemented secure authentication, user profile management, and a password reset feature

3) **Photography Store** GitHub Link
Developed a multi-language e-commerce web application with product browsing, detailed views, shopping cart, user profiles, order history, discount vouchers, voice and filter-based search, and integration with credit card and Orange Money payments. Admin panel included management of products, categories, users, and vouchers. Social sharing via Facebook was also supported.
Served as the Scrum Master, facilitating Agile ceremonies, tracking team progress, and ensuring effective communication and delivery.

4) **Task Management System** GitHub Link
Personal Task Management System is an MVC-based web application that helps individual users organize and track their daily tasks. Users can create, update, and manage tasks, view progress through dynamic dashboards, and stay productive with real-time status updates and summaries.

Education

Orange Coding Academy, Irbid-Jordan **Dec 2024- May 2025**

Intensive course in Full Stack Web Development in collaboration with Simplon.co and Princess Sumaya University for Technology (PSUT).

Yarmouk University, Irbid/Jordan **Apr 2018 - Sep 2022**

Bachelor's in Biomedical Physics
